ENFORCER

SPRINT CAR BY CUSTOM WORKS

Custom Works' newest weapon for the dirt oval wars.

Based on the very popular INTIMIDATOR 2WD oval race car, the **ENFORCER** incorporates many *unique features*. These features include an injection molded nylon cage for toughness and durability; a true air-foil wing for increased down-force that uses less wing angle (increasing speed); a highly detailed, four-piece body giving unmatched scale realism; and the high quality equipment that comes with all Custom Works kits. Each kit includes: full ball bearings, ball differential, sliding rack steering, hardened steel drive components, Delta pressurized shocks, fully independent A-arm suspension, graphite chassis, tires, and wheels.

Get the ENFORCER Sprint Car and start your own arsenal.

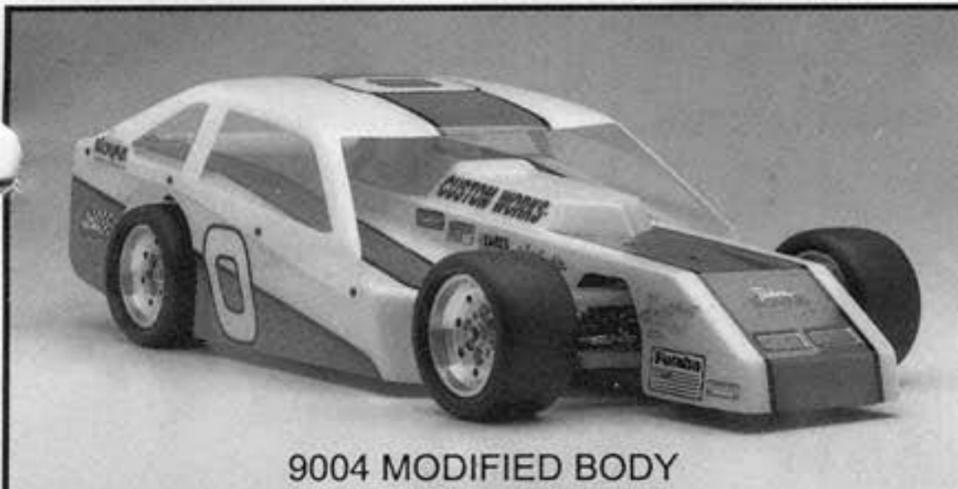

Components are available separately to create your own weapon.
